

To whom it may concern

Your inquiry about entry in the ECHA SCIP-Database for Endress+Hauser products

Dear valued customer

With the amending of Directive 2008/98/EC on waste to (EU) 2018/851, manufacturers must provide information on SvHC (Substances of very High Concern) in their products together with other information also to ECHA via the central database SCIP (Substances of Concern In articles as such or in complex objects (Products)).

As this requirement applies to all manufacturers and sales organizations that supply products to the EU, it also applies to Endress+Hauser.

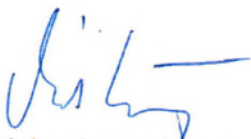

Due to the large volume and the complexity of the information to be supplied a considerable amount of work is involved. We have started data maintenance in the SCIP database. Effected Endress+Hauser products you can find in the SCIP Database <https://echa.europa.eu/scip-database> by searching with the main-ordercode (e.g.CML18, RIA16, COS22) as article identifier.

Endress+Hauser undertakes to comply with its legal obligations.

We trust that this letter will answer your questions. Should you require further information, please contact your local Endress+Hauser Sales Office (see www.endress.com for contact information).

With kind regards

Endress+Hauser Group Services AG
